Prime Vision delivers advanced Parcel Vision System for new London sorting centre

Delft, The Netherlands, December, 2007

Prime Vision, a leading supplier of mail and parcel automation solutions, is pleased to announce that it has completed delivery of an advanced OCR and video coding system for a department of the British Government.

London

This exciting project presented our team with some fantastic new challenges comments Prime Vision CEO Eddy Thans. The parcel traffic includes a high percentage of free form addresses and special codes representing destinations all over the globe. In addition, approximately 50% of the destinations are hand-written, a particular strength of Prime Vision's patented OCR software.

Rob Pieterse, Prime Vision's project manager, comments on the excellent cooperation with the overall integrator FKI Logistex and the customer.

"The customer was very experienced in the field of OCR and their special requirements based on their existing OCR solutions for letter mail," adds Rob.

Prime Vision delivered a turnkey solution including image capture camera systems, OCR and Video Coding.

Prime Vision is a leading supplier of mail and parcel automation solutions. Prime Vision's parcel automation identification solutions suite, Parcel Vision, incorporates our unique OCR recognition technologies for handwritten and machine generated text and is fast becoming the de-facto high-performance standard in the global express-parcel market.
