

## Prime Vision Awarded New Patent For OCR.

Prime Vision, a leading supplier of mail and parcel automation solutions, is pleased to announce that the European Patent Office has awarded a patent for Prime Vision's latest development in OCR technology.

The European Patent Office (EOB) has granted Prime Vision the right to patent one of its newest technologies.

This is defined as "method and device for extracting skeletal data from image data and has been discovered by our research and development team, headed by Dr. Michiel de Rijcke.

Commenting on the news, Michiel adds "this is a significant achievement for Prime Vision and demonstrates our intensive investment in research and development."

Prime Vision's scientists and researchers are continuously searching for new techniques and improvements in the field of image segmentation and hand-written word recognition. By applying this method and device, Prime Vision expects to further improve its state-of-the-art OCR and ICR systems for our valued partners and clients.

Prime Vision is a leading supplier of mail and parcel automation solutions. Prime Vision's parcel automation identification solutions suite, Parcel Vision, incorporates our unique OCR recognition technologies for handwritten and machine generated text and is fast becoming the de-facto high-performance standard in the global express-parcel market.
